## OBJECTIVE

---

**Node.js Full-Stack Development / Internship in Node.js Full-Stack Development**

## EDUCATION

---

### Federal University of ABC

*Bachelor of Science in Computer Science*

São Paulo

2023 – 2027

### Federal University of ABC

*Bachelor's Degrees, in Science and Technology*

São Paulo

2023 – 2026

## PROJECTS

---

### GetAPet | *Node.js, React, MongoDB, javascript*

Fev 2023

- \* Developed a full-stack web application to facilitate pet adoption using Node.js for the backend service and React for the frontend.
- \* Utilized the cookie-parser middleware to parse client request cookies.
- \* Implemented JsonWebToken for secure user action validation based on individual account credentials.
- \* Ensured password security through bcrypt encryption and API-frontend connection using Cors.

### MiniBlog | *React, Node.js, Firebase*

Fev 2023 – Present

- \* The application is a full-stack web app built with React, Firebase, and related libraries such as React-DOM and React-Router-DOM. It provides users with the ability to write and publish content about their interests.
- \* Backend Service: The application utilizes Firebase as the backend service to store and manage user data, allowing for efficient data management and organization.
- \* Context API: The application implements the Context API, which allows for a simpler way of managing state across multiple components, making it easier to maintain and update the application.

### Toughts | *Node, mySQL, HTML, CSS, JavaScript*

Jan 2023 – jan 2023

- \* Developed a blog platform to share thoughts and connected it to a database using Sequelize.
- \* Published views using express-handlebars as the frontend to the API.
- \* Encrypted passwords securely using bcrypt.
- \* Followed the Model-View-Controller design pattern throughout the project.

### ResuBooks | *Node, mySQL, HTML, CSS, JavaScript*

Dec 2022 – Jan 2023

- \* Created a website to save book resumes and allow sharing with others.
- \* Developed a CRUD-based system allowing users to interact with the database through APIs.

### To do | *Node, Mysql, HTML, CSS, JavaScript*

Jan 2023 – Jan 2023

- \* An online task site was built using Sequelize to connect to MySQL.
- \* The MVC pattern was used for application design to implement control logic interfaces.

### Shop | *Node, MongoDB, HTML, CSS, JavaScript*

Jan 2023 – Jan 2023

- \* Developed an online marketplace website using Mongoose for MongoDB connection.

## TECHNICAL SKILLS

---

**Languages:** JavaScript and HTML/CSS.

**Databases:** SQL (Postgres, MySQL and MariaDB), noSQL (MongoDb and Redis).

**Frameworks:** Node.js, React, and FastAPI.

**Developer Tools:** Git, Docker, Insomnia, Postman, Cloud Hosting, VS Code and Visual Studio.

**Libraries:** Express, NestJS, Cors, Multer, Axios. Sequelize, Mongoose, Chalk, Bcrypt and Cookie-parser.

**Languages:** Portuguese (Native) and English (Advanced).
